Alexandria, VA 22313-1450

Dear Sir:

Enclosed is a form PTO/SB/08. In accordance with 37 C.F.R. §1.97(c)(2), this Supplemental Information Disclosure Statement is being submitted with a fee of \$180 as required by §1.17(p). Copies of all listed documents are enclosed, including copies of all of the "Non Patent Literature Documents" listed on the Form PTO/SB/08 previously submitted with the filing of this application because it is unclear to the applicant which of those previously-listed non-patent documents were considered by the Examiner.

Pursuant to MPEP §609, where a listed document herein shows a document date only by a year which is the same as or earlier than the year of the effective U.S. filing date of this application, this will confirm that such document date is sufficiently earlier than the effective U.S. filing date that the particular month of the document year is not in issue.

Both the parent and grandparent patents of the present application are currently involved in a litigation identified by documents CI through CV. Unlike early court documents that were filed in the summer and fall of 2003, these more recent documents now contain some allegations of facts regarding patent issues.

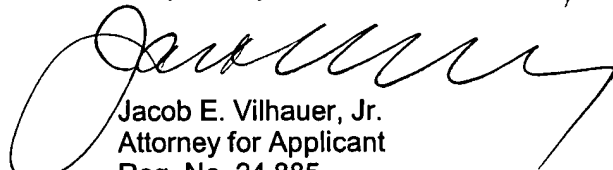

Documents CD and CF do not allege activities which constitute prior art under 35 U.S.C. §102 because of their foreign location and lack of demonstrated public accessibility in this country.

Moreover, none of the enclosed documents BC through CV discloses prior art suggesting the particular combination of limitations expressly required by the claims presented herein.

In accordance with 37 C.F.R. §1.97(h), the filing of this Supplemental Information Disclosure Statement shall not be construed to be an admission that the information cited in it is, or is considered to be, material to patentability as defined in 37 C.F.R. §1.56(b), nor that it constitutes prior art with respect to the present invention.

The person making this statement is the attorney who signs below on the basis of the information in his file.

Respectfully submitted,

Jacob E. Vilhauer, Jr.
